

Your local water provider, Kentucky-American Water Company, has proposed an increase in rates generating an additional \$25.8 million per year. That is an increase of about 37%. That means the average water bill will increase from \$25.44 to \$34.88 per month.

Kentucky American says the major reason for this increase is to pay for the construction of a new water treatment facility in Owen County and a pipeline from that facility to Lexington.

Please write how this increase will affect your household. Your written comments will be forwarded to the Public Service Commission:
